

# ALLERGEN INFORMATION

Chick-fil-A cooks in 100% refined peanut oil. According to the FDA, highly refined oils, such as highly refined soybean and peanut oil, are not considered major food allergens and therefore are not identified on this list. Due to the handcrafted nature of our food, variations in our supplier ingredients, and our use of shared cooking and preparation areas, we cannot ensure that our food is free from any allergens. We prepare our foods following procedures to prevent allergen cross-contact, but products containing wheat, egg, soy and milk are all made in our kitchens. There could be other potential allergens not addressed here. Please consult the ingredients of each product prior to consuming.
